QEHS SIXTH FORM

BUSINESS

Cambridge OCR A Level

ABOUT THE COURSE

The main areas of study are accounting and finance, external influences, marketing, operations and people in organisations.

Topics include marketing , human resources, operations management (methods of production, capacity management, stock control and logistics/supply chain solutions) and accounting and finance.

Business has become one of the most popular post-16 choices in recent years and has experienced huge growth. This course will provide students with an excellent qualification that is both academic in its content and modern in its delivery. Business incorporates what is happening in the present day business environment at local, national and international levels. There is some mathematical content and good oral and written communication skills are necessary. Students will be expected to use different IT software to present their work.

The main difference from GCSE is that students will develop a critical understanding and application of business theory, acting in a "managerial role" and using their skills to solve real business issues.

ENTRY REQUIREMENTS

QEHS Sixth Form Admissions Criteria: A minimum of **36 points** across the best GCSE grades

Subject Entry Requirement: GCSE Business is helpful but not essential. Mathematical skills are beneficial.

CAREERS

Beyond A Level, students can proceed to study Business related degrees. The possibilities are vast and, as such, this qualification provides many opportunities post-18.

Joshua Jackson

A former QEHS student's experience

I thoroughly enjoyed Sixth Form life at QEHS. I was encouraged to reach my full potential, both academically and socially, while benefiting from a wealth of opportunities, including developing valuable links with the world of business and gaining skills that have prepared me for life beyond QEHS

Studied at QEHS: 2015 - 2022

Subjects: Maths, Business Studies and Physics

Next steps: University of Nottingham

BSc (Hons) Economics
